

# PitStop Professional

PitStop Professional is the industry standard for PDF preflight, auto-correction and editing. It's the Adobe® Acrobat® plug-in that is indispensable to every graphic arts and publishing professional. Enfocus PDF Profiles allow you to check critical PDF attributes and automatically correct common errors. Powerful Certified PDF® technology enables immediate visual feedback and allows you track every edit made to a PDF.

PitStop Professional features comprehensive interactive inspection and editing tools that allow you to change text, images, line-art, colors and a wide range of other PDF attributes. Global Change functionality enables universal changes throughout a page or an entire document and Action Lists can be used to automate repetitive tasks.

The preflighting capabilities in PitStop Professional are beyond compare with the integration of the PDF Profile and Certified PDF technologies. Enfocus PDF Profiles allow you to check all critical issues and automatically correct over 100 of the most common errors encountered in your PDF files. Enfocus' Certified PDF technology embeds the PDF Profile and preflight report in the file, displaying immediate visual feedback that reveals whether or not the file complies with your selected PDF quality specifications. A Certified PDF file tracks all edits and allows for version comparison and roll back.
